

New Yorker magazine 2012

Here you find a cover of the New Yorker magazine, March 2012 issue. It is a very good example of how the ruling elite communicate about certain events. Not really sure what the letters on the left in the colored circles mean, but the steps on the cover with all the locations are clear. They are all locations where after this magazine came out, in 2012 earthquakes or storms occurred. Now for the majority of people, this cover means nothing, but for the people in the know it is a warning.

Now I am sure a lot of you will be sceptical and that is okay. By the way these are not MY findings, it was an American guy I follow for many years now and he made a video about it, back then.

I am not sure why the starting point (the financial district) and the end point (El Barrio) are depicted as the sun. I do however know why the center of the earth and Saturn are in there. But I will leave it open for anyone to have their own thoughts on. But please look at the magazine step by step and click the links to see what happened there that year, after this magazine came out. Coincidence or not?
